To Whom It May Concern:

Schenker International, Inc. has worked with Adkins Export Packing for over 15 years at their Louisville location. During these years Adkins Export Packing has proven to be very knowledgeable in all aspects of export crating, handling oversize shipments, involving both transportation and rigging of heavy machinery. They have offered many beneficial suggestions to our company in the transportation of our project cargo. Adkins Export Packing has given our company excellent customer service and have been very dependable. I, personally have not dealt with a packer that has even come close to the quality work and knowledge of Adkins Export Packing.

The Georgia Ports Authority would greatly benefit having a company with the professionalism, knowledge and quality service given by Adkins Export Packing. Their presence would open up the option of using your port for the transportation of oversize and project cargo.

If you should have any questions or concerns please feel free to contact the undersigned.

Sincerely,

Ron Gatlin
