To Whom It May Concern:

As the Plant Engineer at a manufacturing facility, it is very important for me to have a good working relationship with a dependable contractor for machinery moving and export packing. Adkins is that organization for me.

There have been numerous times that we needed equipment transported across the country or around the world. We most recently closed our manufacturing facility in the Kentucky and Adkins was called upon to prepare for transport, over 50 ocean container loads and several air shipments of equipment to Hanau, Germany. We have also had to air freight a complete assembly operation to China in an expeditious manner in order not to delay the delivery of product to our customer. Each time, the people at Adkins have delivered quality work at a competitive price.

Ben Adkins at Adkins Machinery Movers and Export Packing has always responded to our needs with the sense of urgency that I require. I know that when contracting with Adkins for my rigging and export packing needs, the job will be done right and I have nothing to worry about. Professional, quality workmanship at a competitive price makes Adkins my number one call for machinery moving and export packing.

Sincerely,
